

Mercy Medical Center

# Nurse Residency Program

## New Nurse Residency Program Includes

- A myriad of unique learning strategies to support clinical skill development
- Individualized role development guided by experienced nurse facilitators and mentors
- Group networking sessions with other nurse residents
- Immersion in evidence-based practice
- Access to content experts
- Cohort specific social activities

## About the Program

Mercy Medical Center, a leader in the Maryland Nurse Residency Collaborative, offers a 12-month Nurse Residency Program (NRP) designed to provide orientation, support, mentorship and education for the new graduate nurse. The nurse will benefit from comprehensive and individualized attention that focuses on opportunities for enhanced clinical and leadership skills, as well as continual professional development.

## Areas of Concentration

- Critical thinking
- Hands-on clinical skills training
- Patient safety
- Stress management
- Resource management
- Communication
- Leadership development
- Professional career planning
